

The 144 club

The 144 Club is a very special club! To be part of the club children have to prove they know their times tables. Children will be given the chance, once a week, to complete a times tables test. Children in Years 4 to 6 have to answer 144 questions correctly in less than five minutes.

Once in the club, children have to take a test again, every half term, to retain their place. The aim is that they beat their own personal best each time. If a child has not yet made it into the club, their aim is to beat their own personal best each week.

Here are the 144 Club tests (and answers) for children if would like to practice at home:

Club 1 and 2

Children in Year 1 can be part of the Club 1 by demonstrating their number bonds (including related subtraction facts) to 20 knowledge. Children in Year 2 need to demonstrate their knowledge of number bonds to 100 to secure their place in the Club 2. Children will be given the opportunity to join the club on a weekly basis. Successful members will receive a certificate and a sticker.

Once in the club, children will have to take a test again, every half term to retain their place. The aim is that they beat their own personal best each time.
